Description

ICOM - Original diagnostic interface for BMW vehicles Full factory support The ICOM is Actia's latest VCI and designed specifically for BMW vehicles. Combined with the official ISTA diagnostic software, this factory device provides full access to all dealer functions, including fault code analysis, programming and system updates. Seamless integration with ISTA software The ICOM is designed to work seamlessly with the original ISTA diagnostic software. This provides technicians with the same comprehensive functionality as official BMW dealers, resulting in reliable and accurate diagnoses. Flexible connectivity The interface features integrated WiFi, USB-A and an Ethernet cable. This offers both the freedom of wireless operation and the security of a stable wired connection, depending on workshop conditions. Indispensable for professionals For garages and specialists working on BMW vehicles, the ICOM is an essential diagnostic tool. It enables technicians to service vehicles fully in accordance with official factory specifications and perform all necessary...
