Description

Autel MaxiCharger W22-S-4G - Three-Phase 22 kW Wallbox with Socket
The Autel MaxiCharger W22-S-4G is a powerful and smart charging solution for electric vehicles. This three-phase AC wallbox delivers 22 kW of power (32 A per phase), allowing vehicles to be charged much faster than with a standard home charger. With socket instead of fixed cable Unlike the W22-C5, which comes with a fixed Type 2 charging cable, the W22-S-4G is equipped with a Type 2 socket. This allows you to use your own separate charging cable. This offers more flexibility, especially in locations where multiple vehicles with different cables or connections use the same charging station. Smart features and connectivity Through the Autel app, you can easily plan, monitor and manage charging sessions. The wallbox supports features such as dynamic load balancing, which optimizes the distribution of available power when multiple charge points are in use at the same time...
