

## Volvo OBD to Ethernet Adapter

Volvo OBD to Ethernet VOE adapter suitable for Volvo vehicles on the SPA and CMA platform from year 2016 onwards. OEM quality for diagnosis and communication via VIDA and other compatible software systems. Replaces part number 9513108 and 9513062.

# Description

This Volvo VOE OBD to Ethernet adapter is designed for vehicles on the SPA and CMA platform from 2016. The adapter provides a reliable connection between the vehicle's OBD diagnostic port and a PC or laptop running VIDA or other diagnostic software. This allows you to read out fault codes, view live data, check modules and perform advanced diagnostic procedures as required by Volvo.

The adapter is a direct replacement for Volvo parts 9513108 and 9513062. With its high build quality and precise fit, this cable works identically to original dealer equipment.

## Key features
